### **Science Fair Progression & Checklist**

Your son or daughter has been working on their Science Fair project in class and outside of class since early November. As a way to check how far they have come along and to see what else they need to complete, you are being asked to fill out this checklist, sign and date it and give it back to your child to turn in on Monday January 12th. This checklist will also help you become more familiar with their project.

Your child is not expected to have all of these items complete at this time. **Please do not mark off items that are not complete! The Science Dept. needs to have an accurate idea of how far along everyone is.**

The Science Fair will take place on January 22nd.
